MP4-12C

# 1.0 EXTERIOR OPTIONS

**Carbon Fibre Mirror Casings, Turning Vanes & Rear Diffuser**

Carbon fibre is at the heart of the MP4-12C. The unique, lightweight MonoCell at its core helped us achieve the optimum balance of weight, power and fuel efficiency. You can choose to upgrade your 12C's turning vanes, diffuser, splitter and mirrors to stunning lacquered carbon fibre, to highlight the advanced carbon technology under the skin of your 12C.

1 **Carbon Fibre Mirrors Casings**
Exterior mirror casings finished in carbon fibre

2 **Carbon Fibre Turning Vanes**
Turning vane panels finished in carbon fibre

3 **Carbon Fibre Diffuser**
Single piece carbon fibre rear diffuser

4 **Stealth Pack**
Exhaust finishers and airbrake mechanism finished in satin black

5 **Carbon Fibre Splitter**
Front splitter in carbon fibre

**Body Coloured Splitter**
Front splitter in body colour

**Contrast Coloured Splitter**
Front splitter in contrast colour from exterior paint range

# 1.0 EXTERIOR OPTIONS

## Carbon Fibre Engine Bay Panels & Covers

The highly efficient McLaren M838T engine is framed by the 12C's glass cover. You can accentuate this area further by specifying the engine's plenum, header tank covers and surrounding engine panels in carbon fibre.

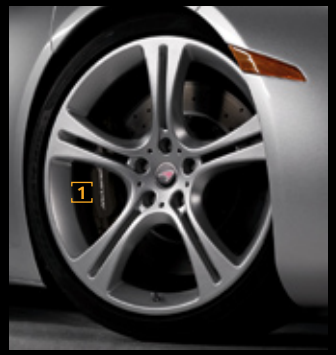
## WHEELS & CALLIPERS

**Standard Wheel**



Silver Stealth

**Lightweight Wheel**

Silver Stealth

**Super-Lightweight Wheel**

Silver Stealth

The Lightweight and Super-Lightweight forged optional wheels offer significant weight savings for owners wanting to save precious kilograms and increase performance even further.

By using forged alloy, our engineers have stripped out the mass, while maintaining strength. The 5-spoke Lightweight forged wheels have a technical look and save 6kg, or 12%, when compared to the standard cast wheels. The 10-spoke Super-Lightweight forged wheels offer a pure performance look and are a total of 10kg lighter – a 20% weight-saving

**Standard**

**Lightweight Forged Wheel (requires TPMS)**

**Super-Lightweight Forged Wheel (requires TPMS)**

**Stealth Finish**
Standard silver wheel finish can be changed to a satin gunmetal finish, giving your 12C a striking, more aggressive presence.

**Special Colour Brake Callipers**
You can complete your own personal wheel design by changing the brake callipers from the standard black [1] to red [2], McLaren orange [3] or silver [4]. If you specify the Carbon Ceramic Brakes, it is also possible to upgrade to a polished finish calliper.

**Tyre Pressure Monitoring System (TPMS)**
Tyre pressure is essential for maintaining the performance and efficiency of the 12C. TPMS continually analyses the pressure and temperature of each individual tyre, whether the car is moving or stationary. You can drive safe in the knowledge that if tyre pressure is too high, or too low, the system will alert you immediately.

**Brake calliper**

- Black (standard)
- Silver
- Red
- Orange

2.0

# PERFORMANCE OPTIONS

**1 Carbon Ceramic Brakes**

For the driver who seeks the ultimate in braking performance, durability and reliability on the track, the standard cast iron brakes can be upgraded to the 12C's Formula 1-derived Carbon Ceramic Brakes. The significantly larger 394mm diameter front discs and 380mm rear discs, combined with the unique, heat-resistant properties of the carbon ceramic material, make them less susceptible to brake-fade and means they perform consistently even when under pressure from repeated, heavy braking. The 12C's carbon ceramic discs are also matched with larger six-piston front and four-piston rear callipers. These can be personalised in several ways including a polished finish inspired by the Formula 1 Championship winning car, the MP4-23.

Please note: the service life of even the most durable brake pads and discs can be reduced with performance driving. As with any braking system, we recommend that they are inspected by a professional after every track event.

**Sport Exhaust**

For the MP4-12C's stainless steel exhaust system, we designed an innovative mixing box to avoid the use of a conventional, heavy silencer box. By using Inconel, a tough material also found on our Formula 1 cars, we've been able to create a thinner, lighter Sport Exhaust. We've also altered the Sport Exhaust's geometry to deliver a more intense, amplified sound. Its distinctive, rhythmic low rumble is punctuated by powerful acoustics every time you step on the 12C's accelerator and take it up through the gears. Louder and more exhilarating, it creates an unmistakable McLaren sound.

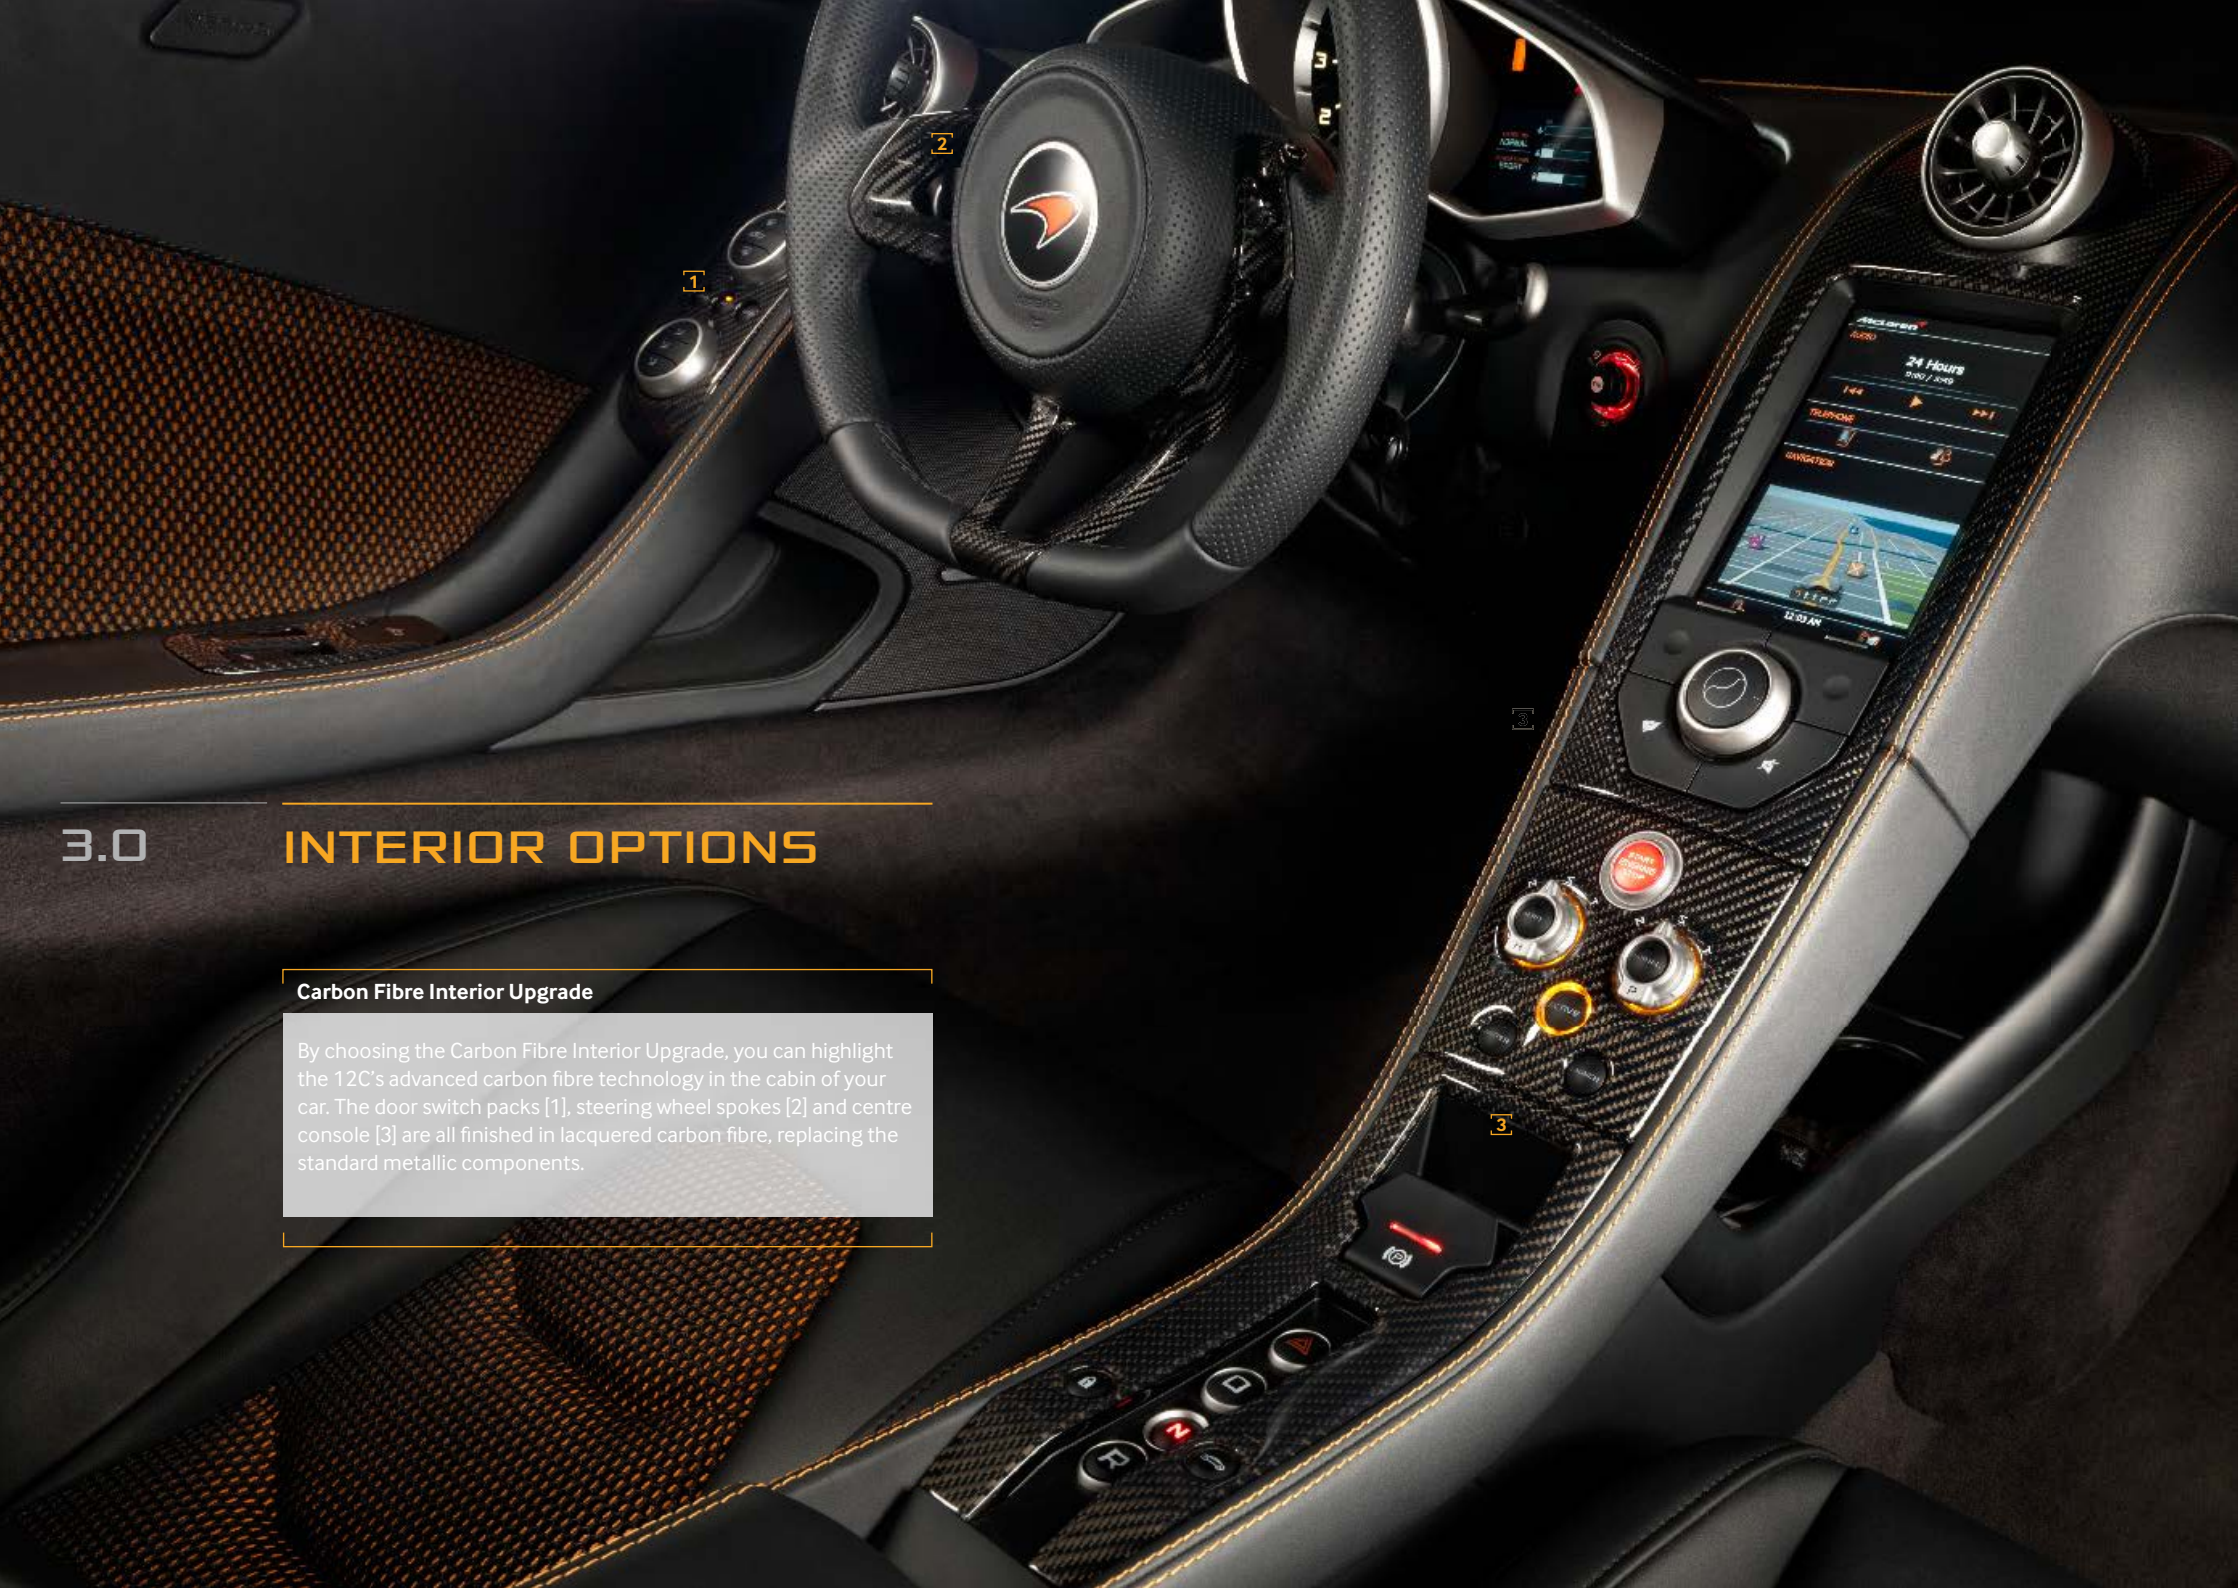
**Additional Super-Lightweight Forged Wheels with Corsa Tyres***

When you're on the track, a specialist tyre helps you get the most out of your 12C's performance. We've developed our Corsa tyres with Pirelli to offer superior dry-weather grip. Special compound and tread, combined with a unique construction, will help you maximise your lap times when performance driving. This option gives you an extra set of Super-Lightweight Forged Wheels, fitted with Corsa Tyres.

**Additional Wheels with Winter Tyres***

For more control in extreme wet or low grip conditions, Winter Tyres are specially developed to deliver extra grip. This option gives you an extra set of standard wheels, fitted with Winter Tyres.

***Requires TPMS**



# 3.0 INTERIOR OPTIONS

**Carbon Fibre Interior Upgrade**

By choosing the Carbon Fibre Interior Upgrade, you can highlight the 12C's advanced carbon fibre technology in the cabin of your car. The door switch packs [1], steering wheel spokes [2] and centre console [3] are all finished in lacquered carbon fibre, replacing the standard metallic components.

# 3.0 INTERIOR OPTIONS

Carbon Fibre options – Sill Panels & Wheel Arches

**1** **Carbon Fibre Sill Panels**

**2** **Carbon Fibre Wheel Arches**

**Carbon Fibre Seat Back**

**3** **Electric & Heated Memory Seats**
The MP4-12C's electric and heated seats upgrade offers the ultimate in comfort and control for you and your passenger. The fully electric seats offer two heat settings as well as a 3-position memory, while a sophisticated 6-way electrical adjust and 4-way lumbar adjust mean that you can tailor your seat position for maximum support and comfort on long journeys. When you turn the 12C's engine off and open its distinctive dihedral door, this option's 'easy-entry' feature can automatically move the driver seat back and down, allowing you to step out of, and back into the car with greater ease.

# 4.0 AUDIO & COMMUNICATIONS OPTIONS

**Optional IRIS system**

**The ultimate in onboard entertainment**
MP4-12C's portrait touch-screen gives you access to the car's on-board entertainment, media and communication systems, every element of which has been intelligently designed by McLaren.
The 12C features a Meridian 2-channel, 4-speaker sound system, hard drive with media player, radio, electronic user manual and Bluetooth telephony accessible via the touch-screen. USB and audio jack ports allow you to connect media players, with integrated support for Apple iPod and Microsoft Zune.

**IRIS Upgrade with Satellite Navigation & Meridian Surround Sound System**
The IRIS option gives you a significant upgrade to the 12C's media system. You can use voice-control to access an advanced navigation system while driving. The hard drive is increased in capacity and additional features include a picture and video viewer. The upgrade also gives your 12C WLAN connectivity, allowing you to transfer tracks and files remotely to your 12C from your laptop, or home or office computer when the car is parked within range.

We've partnered with world-renowned audio specialists Meridian to design a truly bespoke sound system for the 12C. Using the very latest Digital Signal Processing (DSP) technology, it delivers the ultimate sound, in a compact, lightweight package. It also continually assesses the driving conditions and adjusts to maintain a consistent, high-quality output. Choose the IRIS option and your 12C's 2-channel, 4-speaker sound system is replaced with a 7-speaker surround sound system for a superior, pure and vibrant audio experience. Giving you the ultimate in audio and communication, we have called our upgrade system IRIS, named after a messenger to the gods in ancient Greek mythology.

# 5.0 SAFETY & SECURITY

**Parking Sensors (front & rear)**
Flush-mounted parking sensors on the 12C's front and rear bumpers activate a warning sound within the cabin to make parking easier and safer.

**Vehicle Tracking**
The Vehicle Tracking system option ensures your 12C can be located if it is stolen. The 12C-specific hardware is built into the car which enables a comprehensive service including Stolen Vehicle Detection, Tracking and Location, and access to a customer helpline 24 hours a day, 7 days a week.

**Volumetric Alarm Upgrade**
The 12C's standard alarm system protects your car should anyone attempt to break into, or steal it. The doors, luggage cell and engine bay are all monitored, while an anti-tow sensor activates the alarm if anyone attempts to tow your car while it's locked. The alarm upgrade option adds a sophisticated volumetric interior sensor that monitors movement in the cabin, so even if you've left a window open, your 12C is still protected.

# 6.0 ACCESSORIES

**Fire Extinguisher**
You can equip your 12C with a fire extinguisher, which is securely housed in the luggage cell.

**Branded Car Cover**
The branded car cover protects your 12C when indoors.

**Warning Triangle and First Aid Kit**
An accessories pack containing a warning triangle and first aid kit, which neatly stows in the front luggage cell, is available.

**Ashtray**
An ashtray can be supplied in the cup holder.

**Issue Date: December 9, 2010.** The availability of options may vary from market to market due to local restrictions and regulations.
